

Confined Space Awareness

This in-house course is designed around the principal U.K. safety legislation relevant for confined space entry work. It covers the requirements demanded under the Confined Spaces Regulations for low risk work and is delivered over 1 day.

Target

The programme is suitable for Safety Managers, supervisors, permit issuers & operatives.

Day one is theory based, and day two involves confined space entry with the use of BA kit or an escape set – depending on your company requirements.

Certification

An in-house competence certificate is awarded.

Location

Delivered in-house at your premises or at SHE Knows Ltd:

- ✓ Goulton St (Hull),
- ✓ King Edward St (Grimsby),
- ✓ Catch (Immingham).

Module

Theory Session

- ✓ Legislative requirements - Including the requirement under the Confined Spaces Regulations to find a reasonably practicable method of carrying out the work otherwise.
- ✓ Identifying the requirements for atmosphere monitoring. Including advantages, disadvantages and limitations of gas monitoring equipment.
- ✓ Understanding of the term %LEL, equating this to quantities of known flammable gases in the atmosphere.
- ✓ Requirements and methods for carrying out successful ventilation.
- ✓ Safe systems of work. - The relationship between risk assessments, method statements and permits to work.

Practical Session

- ✓ Optional day 2 - Confined Space Entry Training on request.
