

Electrical Safety Training

One thousand accidents per year are caused by electric shock or burns. About thirty of those reported are fatal. Most of these accidents can be avoided by careful planning and straightforward precautions. We supply basic measures in this course to help you control the risks from your use of electricity at work.

This bespoke course is designed around the Electricity at Work Regulations 1989, teaching its requirements, obligations and how to adhere and implement best practice.

Target

The programme is suitable for Charge-hands, Managers, permit issuers & operatives.

This days training is theory based with an exam at the end.

Certification

An in-house attendance certificate is awarded.

Location

Off site at the SHE Knows office, mobile office or if you prefer in your training rooms.

Contents
