Why choose SMSTS?

SMSTS is one of the most widely recognised courses for Site Managers, Agents and Supervisors. Certificate holders find it easier to prove their skills to contractors and clients and, in fact, many employers insist that all their Site Managers hold the certificate.

An SMSTS qualification helps in a number of other ways. It gives Supervisors the knowledge they need to prepare method statements, risk assessments and all the other requirements of the Health and Safety at Work etc. Act 1974. And because they are better equipped to identify potential hazards on site, their site is safer and more efficient.

The course is designed to be adapted to the needs of each individual to make sure they learn what's useful to them.

The SMSTS course is supported by CITB Grant which helps pay for the training. You can get over £200 towards the five day course and £200 towards the two day course.

As part of the course you'll also get:

- GE700 Construction Site Safety book – the industry-standard reference manual for health and safety.
- XA6 The Site Management Safety Training Scheme Course Notes.
